

INCIDENT MANAGEMENT SITUATION REPORT

MONDAY, JUNE 22, 1998 - 0530 MDT

NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION:

Increased initial attack activity was reported in California, the Southwest and Southern Areas. Minimal initial attack fire activity was reported elsewhere. The National Interagency Coordination Center processed orders for five Type I crews, an airtanker, an air attack aircraft, engines, radio equipment and miscellaneous overhead for the Southern Area. Very high and extreme fire indices were reported in Nevada, Florida, Georgia, Texas, New Mexico, Southern California, Colorado and Arizona.

SOUTHERN AREA LARGE FIRES:

BUNNELL COMPLEX, Florida State, Flagler, Volusia, and St. Johns Counties. A North Carolina Type II Incident Management Team (Hendricks) is assigned. There are eight fires comprising this complex. The fires are threatening 400-500 homes in the Sunday Trail, Lafayette Landing and Ranchette/ Pioneer Trail areas of Volusia County.

SUWANEE COMPLEX, Florida State, Columbia, Union, Bradford and Baker Counties. A Type I Incident Management Team (Giachino) is assigned. A unified command with Florida Division of Forestry is also in effect. Good progress was made towards completing plow lines in the northwest and southeast portions. Burnout operations were conducted last night to secure hot portions of the line. Heavy accumulations of fuel in dried out swamps are hampering control efforts.

PERRY COMPLEX, Florida State, Taylor County. This complex (previously reported as San Pedro) is located about six miles east northeast of Perry. The Florida Department of Forestry expressed concerns about the amount of fuel available to burn and the inaccessibility of the fires, due to extensive wetlands.

OAK HEAD, Osceola National Forest. This fire is located 20 miles north of Lake City. A Type I Incident Management Team (Greenhoe) is assigned. The fire is threatening high value private timber lands. Significant fire growth occurred yesterday afternoon, due to strong winds. Numerous spot fires spread quickly, resulting in the temporary closure of Interstate 10.

JACKSONVILLE COMPLEX, Florida State, Duval County. A Florida State Incident Management Team (Voltolina) is assigned. This complex is comprised of the Rowe, Yellow Water, Halsema, Boney, Sharon, and Shadowlawn fires. Firefighters spent

yesterday securing fireline and mopping up hot-spots. Smoke continues to be a problem for Jacksonville residents.

GAINESVILLE COMPLEX, Florida State, Alachua County. A Florida State Incident Management Team (Hebb) is assigned. These fires are burning around the community of Waldo. The major fire in this complex is the Race Track-Waldo. Firefighters continued to mop-up fires within the complex. Most of the major fires are contained or close to being declared contained.

HOLIDAY, Apalachicola NF. A Type II Incident Management Team (Corley) is assigned. This fire is 18 miles southwest of Tallahassee. Burnout operations continued last night in the Bradwell Bay Wilderness Area.

SOUTHWEST LARGE FIRES:

WHITE CLAY #1, Navajo State Office, Arizona. This human caused fire is 60 miles west of Phoenix, Arizona. Crews are in the mop up phase of operations.

OSHA FIRE, New Mexico State. This fire is located near the Angel Fire ski area, approximately 20 miles east of Taos. The fire is burning in steep terrain and heavy fuels. Numerous structures are threatened and some evacuations have occurred.

ALASKA LARGE FIRES:

CARLA LAKE, Fort Greely Army Base. This fire is 15 miles southwest of Delta Junction. A Type II Incident Management Team (Ribar) is assigned. Crews continue mop-up, securing the fireline and working on problem areas along the northern and eastern parts of the fire. Continued breezy weather caused interior islands to flare up. Good progress continues on rehabilitation efforts. The Type I Team debriefing was held yesterday. Demobilization is continuing.

OUTLOOK:

Florida and Georgia will be partly cloudy and hot with scattered afternoon thunderstorms. Minimum relative humidities will be 35-40 percent in northern Florida. High temperatures will be in the 90's.

New Mexico and Texas will be mostly sunny and hot. A slight chance of afternoon thunderstorms are possible in southeastern New Mexico and western Texas. South to southwest winds 15-25 MPH will prevail. High temperatures will range from 75 to 85 in the mountains and 95 to 110 in the lower elevations.

Arizona will be mostly sunny and hot. Northern Arizona will experience windy conditions with gusts to 25-35 MPH. High temperatures will be in the mid 70's in the mountains to 105 in the southern deserts.

Alaska will be mostly cloudy with showers and isolated wet thunderstorms. High temperatures will be in the 50's and 60's.
